

Outdoor waste bin with ashtray h19183

Waste collection container complete with cigarette disposal. Material: cement conglomerate with marble grit. Capacity: 130 liters.

Waste collection container **complete with cigarette disposal element** ideal for shopping centers, sports facilities, parks and apartment buildings. Composed of **two cylindrical monoblocks** made of cement conglomerate with marble grit, fixed together using suitable steel fittings. The **waste bin** is completed by a steel mouth reduction plate, laterally hinged and equipped with a lock with a triangular key to access the internal bag holder ring. The ashtray features at the upper end an easily removable steel tube **cigarette butt container**, allowing for quick emptying into the waste bin located at the side and remaining hooked internally to the monoblock.

Technical features:

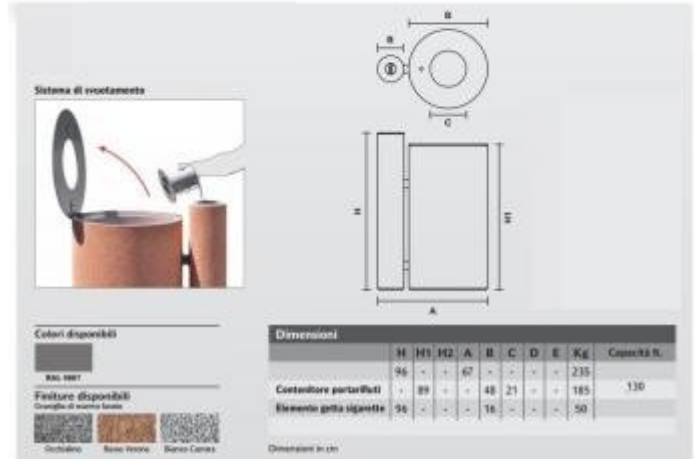

- Material: cement conglomerates with marble grit
- Available in various finishes
- Container capacity: 130 liters
- Dimensions: W.67 x D. 48 x h.96 cm
- Weight: approx. 235 Kg

The product is supplied fully assembled.

Upon request and following a quote, the bin and ashtray can also be supplied separately.
