

Outdoor wooden fountain H34628

Urban furniture fountain in pressure-treated pine wood, 25x25x100 cm. Weather-resistant with brass push-button tap included. The **H34628 fountain** is an urban furniture element designed to combine natural aesthetics and operational functionality in outdoor environments. Made entirely of **pressure-treated pine wood with copper salts**, the structure guarantees deep protection against humidity, weathering, and biological attacks such as fungi and xylophagous insects. The finish with **yellow water-based paint** not only preserves the material, but also ensures a harmonious visual impact in green and rural contexts.

The delivery system is entrusted to a **brass push-button tap**, specifically selected to optimize water consumption and prevent waste in spaces open to the public. The solidity of the design is supported by a square section of 25 cm, ideal for permanent installations in high-traffic areas.

Technical features
