

Outdoor wooden tunnel h575_67

Ludic tunnel in Nordic glulam pine (115x150x102 cm) with CRPLY flooring, designed for motor development and safe exploration.

This playground tunnel is a structural solution designed to encourage motor activity and socialization for children in outdoor recreational contexts. The structure is designed to withstand intensive use cycles and prolonged exposure to atmospheric agents, ensuring high standards of passive safety thanks to the rounding of corners and the full protection of the fastening elements.

Technical specifications

- **Supporting structure:** glulam Nordic pine posts with 90x90 mm section and rounded corners.
- **Protective treatment:** autoclave impregnation with copper and boron salts, free from harmful substances, for the prevention of mold and fungi.
- **Walking surface:** central platform in birch plywood with CRPLY non-slip protective coating.
- **Fastening systems:** stainless steel screws protected by polyethylene safety nut covers and caps.
- **Ground anchoring:** galvanized steel brackets to ensure maximum structural stability.
- **Total dimensions:** L 1150 x W 1500 x H 1020 mm.
- **Safety area:** 315 x 350 cm
- **Installation requirements:** recommended shock-absorbing surface of 11 sq m.
