

Outdoor wooden waste bin h140_544

Urban furniture bin in galvanized steel and Okumè wood, 38L capacity, with integrated ashtray and security lock for public spaces.

The outdoor waste bin **h140_544** is an advanced technical solution designed for waste management in high-traffic urban contexts. The structure integrates the mechanical strength of **galvanized steel** with the natural resistance of **Okumè wood**, offering a product capable of withstanding mechanical stress and atmospheric agents without compromising the aesthetics of parks, squares, and gardens.

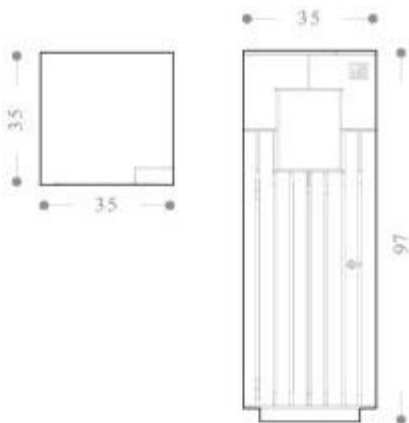

Technical features

- **Volumetric capacity:** internal container of approximately 38 liters.
- **Supporting structure:** galvanized sheet metal supports with a thickness of 6 mm, processed using laser cutting technology.
- **Cladding:** upper paneling in 1.5 mm sheet metal and lower slats in Okumè wood (dimensions 35x15 mm).
- **Waste access:** introduction openings distributed on all four sides for multi-directional use.
- **Opening system:** front door with security lock to prevent unauthorized opening.
- **Internal container:** removable, made of galvanized sheet metal and equipped with ergonomic lateral handles.
- **Integrated accessories:** removable upper ashtray with dedicated extinguishing holes.
- **RAL finishes:** structure in RAL 7016 (anthracite), panels in RAL 7038 (agate), and ashtray in RAL 7005 (mouse grey).
- **Anti-corrosion treatment:** certified cycle including sandblasting, epoxy primer, and oven polymerization at 180°C.
- **Dimensions and mass:** overall weight of 35 kg, equipped with a perforated base for stable ground fixing.
