

## Outdoor wooden waste bin h28797

Square waste bin in steel and pressure-treated pine (41x41x80 cm). 120L capacity with bag holder ring for urban contexts and green areas.

The **h28797** waste bin is a waste collection solution designed to combine structural strength and natural aesthetics. Characterized by a square shape and a volumetric capacity of approximately **120 liters**, it integrates harmoniously into parks, public gardens, and pedestrian paths. The supporting frame is constructed in **solid galvanized steel**, covered with pressure-treated pine slats to ensure maximum protection against atmospheric agents and pests.

## Technical features

- **Dimensions:** 41 x 41 x 80 h cm
- **Capacity:** approximately 120 liters
- **Structure:** solid galvanized steel frame
- **Cladding:** pressure-treated pine slats with non-toxic salts
- **Emptying:** bag extraction from the top via internal bag holder ring
- **Components:** galvanized bolts and hardware according to UNI 3740 standards
- **Anchoring:** integrated supports for stable ground fixing via bolts
