

Outpatient dressing trolley h964_08

Compact trolley with drawer, steel shelf, rails and tiltable bowl. Dimensions: W 57 x D 55 x H 90 cm.

The **outpatient dressing trolley h964_08** is a practical and compact solution designed to support medical staff in clinics, outpatient centers, and medical offices. Thanks to its stable and versatile structure, it facilitates organization and rapid access to the tools and materials needed during dressing procedures. The solid **folded square section steel** structure (25 x 25 mm) is powder-coated to ensure corrosion resistance and ease of cleaning, essential in healthcare environments.

This trolley is equipped with a **drawer with a front height of 130 mm** that allows tools and consumables to be stored safely and in an organized manner. The **450 x 500 mm upper shelf** offers a wide work surface with a recessed edge to prevent objects from falling. The **two 25 x 10 mm instrument rails** allow forceps, scissors, and other accessories to be hung, keeping them always within reach.

One of the distinctive features of the trolley is the presence of a **stainless steel tiltable bowl** with a diameter of 220 mm and a capacity of 2.5 liters, ideal for collecting liquids or waste during dressings. Additionally, the **powder-coated steel accessory basket** (360 x 160 x 150 mm) provides extra space for storing materials and small tools. For hygienic waste management, the trolley includes a practical **waste bag holder with an ABS plastic lid**, which allows for safe and contamination-free waste disposal.

The trolley is easy to move thanks to the **100 mm wheels with plastic housing**, two of which are equipped with brakes to ensure stability during use. The **integrated bumpers** protect the trolley and the surrounding environment from accidental impacts. Decorative elements, such as the **drawer front** and the frame, are available in an elegant **RAL 5012 blue** color, which adds an aesthetic and professional touch.

Optimize dressing procedures in your clinic with the h964_08 trolley. Contact us today for a personalized quote and discover how to improve the efficiency and organization of your work environment!

User benefits:

- **Optimal organization:** Drawer, shelf, and rails to keep tools and materials within reach.
- **Operational efficiency:** Tilttable bowl and accessory basket for rapid and tidy procedures.
- **Mobility and stability:** Wheels with brakes for smooth movement and secure locking during use.
- **Compact design:** Perfect for outpatient spaces and clinics with limited space.
- **Ease of cleaning:** Steel structure and recessed surfaces for quick sanitization.

FAQ:

1. Is the trolley suitable for small spaces?

Yes, with compact dimensions of 57 x 55 x 90 cm, it is ideal for small outpatient centers and clinics.

2. Is the bowl removable?

Yes, the tilttable bowl can be detached to facilitate cleaning.

3. Are the wheels lockable?

Yes, two of the four wheels are equipped with brakes to ensure stability during procedures.

4. What materials are used for the structure and shelves?

The structure is in powder-coated steel and the shelves are made of the same material to ensure resistance and durability.

Mini buying guide:

When choosing an **outpatient dressing trolley**, it is essential to evaluate several factors to ensure it perfectly meets the needs of your work environment.

First of all, consider the **dimensions** of the trolley. With a width of only 57 cm and a depth of 55 cm, the h964_08 model is perfect for small spaces. This compactness allows you to move easily between clinic rooms or corridors without creating obstructions.

The presence of a **spacious drawer** is essential for keeping tools and materials in order and easily accessible. The **upper shelf with a recessed surface** prevents objects from falling, while the **instrument rails** allow you to hang tools in a practical and visible way.

The **stainless steel tilttable bowl** is ideal for collecting liquids during procedures, and the **accessory basket** adds further space for small tools. An important detail is the **waste bag holder with lid**, which ensures hygienic and safe management of medical waste.

Mobility is guaranteed by the four wheels, two of which are lockable, while the **integrated bumpers** protect against accidental impacts. Finally, choose a trolley made of **durable materials** that are easy to clean, such as powder-coated steel, to ensure durability and constant hygiene.
