

Oxygen cylinder holder 5/7 litres h5509

Portable oxygen cylinder trolley with Ø150 mm rubber wheels, acrylic paint, 40 kg capacity, CE compliant.

The **portable oxygen cylinder trolley** is a solution designed for healthcare facilities such as hospitals, clinics and nursing homes. It allows for the safe and agile transport of oxygen cylinders in medical environments, ensuring stability, ease of maneuver and compliance with industry regulations.

The structure combines constructional robustness with operational practicality: the **Ø150 mm rubber wheels** ensure smooth sliding on floors, while the **strap with buckle** keeps the cylinder securely in place during transport. The **acrylic powder coating** ensures durability and ease of sanitization, which is fundamental in the hospital environment.

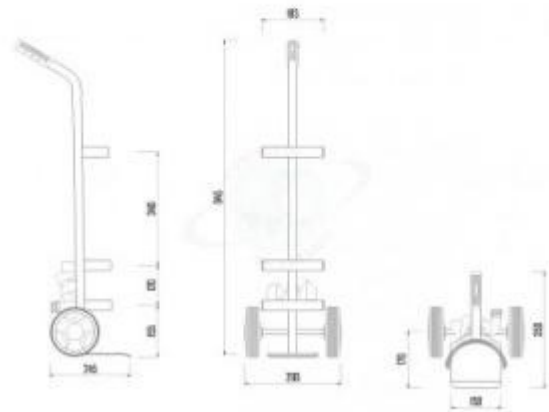

Technical features

- Non-toxic rubber handle
- Strap with buckle positioned at h.275 mm
- Number of wheels: 2 (rubberized Ø150 mm)
- Acrylic powder coating
- Color: white RAL 9010
- Suitable for Ø160 mm cylinder
- Overall dimensions: 290 × 350 × 945 mm
- Ring heights: 155 mm, 275 mm, 615 mm
- Loading plate: 150 × 150 mm
- Maximum capacity: 40 kg
- Self weight: 3.5 kg
- Compliant with CE Standards
- Production: Made in Italy
