

Oxygen cylinder holder for healthcare environments h5538

Sanitary oxygen cylinder holder 10/14 lt, 3 convertible wheels, capacity 100 kg, for Ø160 cylinders.

The oxygen cylinder holder is an indispensable piece of equipment in healthcare and hospital environments, designed for the safe and manageable transport of medical oxygen cylinders. This trolley is specifically sized for cylinders with a diameter of Ø160 and allows for frequent and controlled movement thanks to its lightweight yet robust structure.

The **3 convertible wheels** configuration offers operational versatility: it allows switching from a 2-wheel configuration for transport in tight spaces to a 3-wheel configuration for superior stability during stationary operations. The maximum capacity of **100 kg** ensures the safe loading of steel cylinders of various sizes.

Technical features

- Compatibility: Ø160 cylinder
- Cylinder capacity: 10/14 liters
- Fixed rubber wheels: 2 × Ø200 mm
- Swivel wheel on joint: Ø65 mm
- Transformation: from 2 to 3 wheels
- Maximum capacity: 100 kg
- Own weight: 7 kg
- Tightening system: 2 straps
- Grip: non-toxic rubber
- Handle: ergonomic
- Finish: acrylic powder coating
- Color: white
- Base plate: 195 × 180 mm
- Overall dimensions: H.1100 × D.325 × W.300 mm
- Ring height range: 245 ÷ 500 mm
