

Oxygen Cylinder Transport Trolley h448_36

Epoxy steel trolley for oxygen cylinders, mixed wheels, support belt, dim. 43×70×95 mm. For medical environments.

Specialized trolley for the safe transport of oxygen cylinders in hospital environments, clinics, nursing homes, and home care contexts. The **steel structure with epoxy coating** guarantees corrosion resistance and ease of sanitization, essential requirements in medical environments. Equipped with a **support belt** for securing the cylinder during transport, it prevents accidental slips and falls.

Technical characteristics

- **Steel structure with epoxy coating**
- **Integrated support belt**
- Two 60 mm wheels and two 200 mm wheels (mixed configuration for maneuverability and stability)
- Compatible with cylinders with a diameter of Ø 140 mm
- Dimensions: W. 43 × D. 70 × H. 95 cm
