Oxygen cylinder transport trolley h5535

Oxygen cylinder trolley for hospitals and clinics, Ø250 capacity, 6 smooth-running wheels for stair transport, 40/50 lt capacity.

The **oxygen cylinder trolley** is a specific handling solution for healthcare facilities such as hospitals, nursing homes, and clinics. Designed for the safe transport of large-format oxygen cylinders, it offers stability and practicality in hospital environments where accessibility is critical, including climbing stairs.

The trolley solves the logistical problem of manual transport of heavy cylinders in complex healthcare settings, ensuring safety for the operator and protection for the cylinder.

Technical specifications

- Compatibility: **Ø 250** cylinders
- Capacity: **40/50 liters**
- Wheel system: **6 wheels on rotating stars Ø 150 mm**
- Stair transport: compliant with dedicated geometry
- Dimensions: **H 1250 × D 550 × W 490 mm**
- Self-weight: **15 kg**
- Cylinder containment chain
- Central reinforcement bar for transport stability
- Steel push handle
- Ergonomic grip
- Finish: acrylic powder coating
