

Oxygen cylinder trolley h442_26

Oxygen cylinder transport trolley, suitable for 5-10L, adjustable height, wheels, 11kg capacity.

The oxygen cylinder trolley is an indispensable solution for the safe and easy transport of cylinders in healthcare and home environments. Designed to facilitate movement in hospitals, private clinics, and care facilities, it allows for the transport of 5 and 10-liter cylinders while maintaining stability and practicality of use.

The **fixing bracket with anchoring strap** guarantees the **secure containment of the cylinder** during movement, while the **wheels allow for easy mobility** in indoor environments. The **adjustable height** via a fixing clamp adapts to the operational needs of different users and contexts of use.

Technical features

- Color: white 9002
- Compatibility: 5 and 10-liter cylinders
- Height: adjustable via fixing clamp
- Fixing bracket with anchoring strap
- Equipped with wheels for mobility
- Load capacity: 11 kg
