

Oxygen cylinder trolley h695_01

Oxygen cylinder transport trolley in steel and aluminum, 5 wheels Ø50mm, max load 25kg, safety belt.

The trolley for transporting oxygen cylinders is a specialized aid for the rapid and controlled movement of cylinders within hospital facilities, clinics, and healthcare settings, also suitable for private use. It solves the need to safely transport medical equipment of significant weight, minimizing the risk of cylinder damage and operator fatigue.

Technical features

- **Structure:** steel and aluminum
- **Compatibility:** 10/11 liter cylinders
- **Maximum load:** 25 kg
- **Fastening system:** safety belt
- **Wheels:** 5 wheels Ø 50 mm (2 lockable)
- **Height:** approx. 930 mm
- **Base:** Ø 610 mm
- **Own weight:** approx. 5 kg
