

Oxygen cylinder trolley h695_02

Trolley for 10-11L oxygen cylinders in brushed stainless steel, 5 wheels, safety belt, max load 25kg, hospital and private use.

The oxygen cylinder trolley is an essential device for the safe transport of cylinders in hospital environments, nursing clinics, and private settings. It meets the need to move gas cylinders in a stable and controlled manner, reducing the risk of falls and damage to the container during movement.

The **stainless steel structure with a brushed finish** guarantees robustness and corrosion resistance, while the **integrated safety belt** ensures stable fixing of the cylinder during transport. The **5 wheels (2 lockable)** allow for precise and controlled movements in critical environments.

Technical specifications

- Material: stainless steel
- Finish: brushed
- Compatibility: 10–11 liter cylinders
- Maximum load: 25 kg
- Safety belt
- 5 wheels Ø 75 mm (2 lockable)
- Height: approx. 960 mm
- Base: Ø 640 mm
- Weight: approx. 5 kg
