

Pack of 2 bed restraint belts h983_02

Restraint belts for arms or ankles with reinforced anti-friction cuff, three adjustment eyelets. Total length: 135 cm. Pack of 2 pieces. To be used exclusively by healthcare personnel.

The **H983_02 bed restraint belts** are designed to ensure **controlled movement limitation** in hospital and healthcare environments, offering **maximum safety and comfort** for patients.

Made of **100% cotton**, they are equipped with an **anti-friction cuff reinforced with double braid**, which reduces the risk of skin irritation. The **adjustable circumference from 15 to 30 cm** and the **total length of 135 cm** make them suitable for various usage contexts.

The **Nickel/Brass alloy eyelets** allow for **three adjustment levels**, guaranteeing a **personalized fit** adaptable to different patients. The system also includes a **bed rail strap** with **adjustable length from 50 to 75 cm**, for stable and secure fastening.

To be used exclusively by **specialized healthcare personnel**.

The **safety buttons and the safety key** are available as **options**, allowing for **advanced closure with a security system**. The buttons can **only be opened using the dedicated magnetic key**, offering **maximum protection and control**.

Buy the **H983_02 restraint belts** now for secure and adjustable support in healthcare settings! Request a personalized quote immediately.
