

Package hand truck h6206

Professional powder-coated steel hand truck, 200 kg capacity, 47x47 cm platform. Designed for drums and bulky items with pneumatic wheels.

This **professional steel hand truck** provides a technical solution for the manual handling of heavy loads and bulky packages. Developed to optimize logistic and commercial flows, the frame allows for the safe management of food crates, parcels, and water crates. The specific geometry of the loading base and the supporting structure is configured to accommodate and stabilize **drums, rolls, and demijohns**, preventing dangerous oscillations during transport.

The **powder-coated steel** structure is dimensioned to ensure a high mechanical resistance modulus without compromising operational maneuverability. The use of oversized pneumatic wheels ensures smooth passage over floor irregularities and small height differences, acting as a natural shock absorber to reduce stress transmitted to the load and the operator.

Technical features

- **Material:** high-resistance powder-coated steel
- **Maximum capacity:** 200 kg
- **Total dimensions:** W69 x H120 cm
- **Loading platform dimensions:** 47 x 47 cm
- **Wheels:** pneumatic rubber with 260 mm diameter
- **Structure:** ergonomic with reinforced loading base ("toe plate")
