

Painted steel IV stand h582_04

Painted steel hypodermoclysis stand with 2 hooks and adjustable height (117-203 cm). 5-spoke base with wheels for clinical and home use.

The **hypodermoclysis stand** is a technical support designed for the infusion of fluids and drugs, essential both in professional clinical contexts and in home care. The **painted steel** structure gives the device the necessary rigidity and resistance to intensive use, while ensuring a surface that is easy to sanitize. The telescopic rod allows for millimetric height adjustment, fundamental for correctly managing the flow of fluids based on the patient's needs.

Technical features

- **Material:** high-resistance painted steel
- **Adjustable height:** from 117 cm to 203 cm
- **Supports:** 2 shaped IV drip hooks
- **Base:** 5 stabilizing spokes
- **Mobility:** 5 high-sliding swivel castors
- **Production:** Made in Italy
