

Painted steel parking barrier h328_37

Removable painted steel parking barrier, red and white, height 900 mm, diameter 70 mm, flat top for access control.

The h328_37 parking barrier is an access control and vertical demarcation solution intended for public spaces, corporate parking lots, and residential areas. Designed to ensure safety and order in parking spaces, it allows for flexible traffic management thanks to its removable feature, permitting temporary access or dynamic regulation of areas.

The product is made of **painted steel**, a material that ensures prolonged resistance to atmospheric agents. The **red and white** finish provides immediate visual signaling, while the dimensions — **diameter 70 mm** and **height from the ground 900 mm** — guarantee visibility even in low light conditions. The **flat top** gives a modern and tidy appearance, suitable for urban and residential contexts.
