

Pair of wrist restraints for bed h239_62

Pair of wrist restraints in padded polyester with magnetic key closure. For bed immobilization use.

The **pair of wrist restraints H239_62** is designed to ensure **secure and controlled restraint of the upper limbs** in bedridden patients. Designed for use in **hospitals, healthcare facilities, and care environments**, these wrist restraints prevent dangerous movements or tampering, protecting both the patient and the staff.

Made of **polyester fabric coated with soft padding**, they offer a high level of comfort, reducing the risk of friction or compression injuries. The **magnetic closure system with key**, made of metal and plastic, ensures **safety and control**, preventing accidental openings by the patient or unauthorized persons.

Thanks to the **quick adjustment system**, the wrist restraints easily adapt to different body shapes and hospital beds. They are easy to apply, resistant, and ideal for **temporary restraint under safe and hygienic conditions**.
