

Mobile plastic bollard for outdoor use h16209

Plastic retractable belt barrier column with a solid rubber base. Available in various finishes and belt colors. Belt length 3.7 meters.

Belt barrier ideal for delimiting outdoor areas such as parking lots and reserved zones.

The **belt rewinding mechanism** features an **auto-rewind with slow retraction** thanks to the integrated brake. The **safety terminal hook** of the belt consists of break-proof plastic material. With the belt rewinding mechanism housed inside the column, the belt is protected from dirt, dust, and wear.

The **column is 4-way**: one belt extraction and three receiving ports. **This allows up to 3 belts to be added to the same post.**

The belt barrier column is equipped with a **plastic tube** and a **solid rubber base**. The materials used are resistant to atmospheric agents such as rain, hail, and snow.

Technical features:

- Belt length: **3.70 m**
- Belt width: **5 cm**
- Total weight (post with solid rubber base): approx. 8 kg
- Tube material: **plastic**
- Base material: Plastic/solid rubber
- Outdoor use: yes
- **solid rubber base**: approx. 7 kg

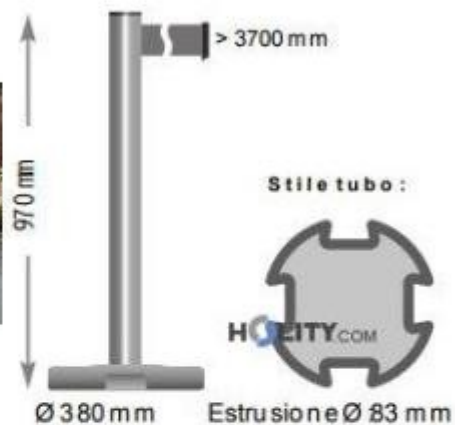

Available on request with:

- **water-fillable base**: approx. 8.5 kg

It is possible to request the belt individually printed in company colors with your logo or with safety warnings
