

Aluminum barrier post with belt h16206

Aluminum profiled guide post with rubberized cast iron base. 2.3-meter belt available in various finishes. Self-retracting belt winder.

Mobile barrier columns ideal for placement at the entrances of theaters, cinemas, museums, banks or as line guides in check-in and waiting areas

The tube is made of **seamless aluminum**, without notches to ensure superior strength and reliability. The **belt winder** mechanism is equipped with a **slow-retraction self-winding** system thanks to the integrated brake. The **safety terminal clip** of the belt consists of shatterproof plastic material. With the belt winder mechanism housed inside the column, the belt is protected from dirt, dust and wear

The **column is 4-way**: one belt in extraction and three receiving ports. **Up to 3 belts can thus be added to the same post.** The **cast iron base with non-slip rubber protection strips**, in addition to allowing exceptional stability and excellent resistance, protects the floor from scratches. The connection of the post and the cast iron base via a quick-release clamp keeps the post secure, fixed and straight.

Technical characteristics:

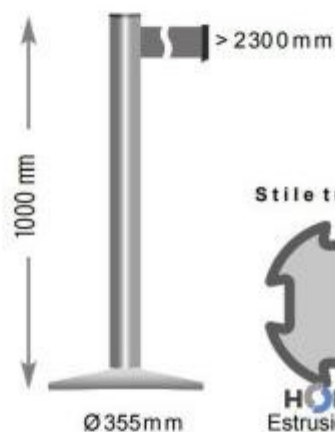

- belt length: **2.3 m**
- belt width: **5 cm**
- total weight: ca 12 kg
