Pallet racking protection h972_56

Steel protection for 80 mm wooden pallet racking. Dimensions: W 175 x D 140 x h 400 mm. Thickness 10 mm. Color yellow.

The **h972_56 wooden racking protection** is a professional solution designed to ensure maximum safety in storage areas and industrial warehouses. Made of **high-resistance steel** with a **thickness of 10 mm**, this protection is suitable for **80 mm wooden pallet racking**, combining structural strength and high visibility.

With **compact dimensions** (W 175 x D 140 x h 400 mm), it effectively protects wooden uprights from accidental impacts caused by forklifts, pallet trucks, or trolleys, extending the life of the load-bearing structures and preventing damage to stored materials.

The **safety yellow paint coating** ensures maximum visibility, improving signaling in high-traffic areas.

The bumper installs securely to the floor and fits perfectly at the base of wooden racking, helping to create a safe, tidy work environment compliant with modern warehouse protection standards.

Improve the safety of your wooden racking with solid and visible steel protection. Order the h972_56 protection now or request a personalized quote for multiple supplies.

Technical features:

- **Material:** Steel
- **Color:** High visibility yellow
- **Steel thickness:** 10 mm
- **Dimensions:** W 175 x D 140 x h 400 mm
- **Weight:** 9.80 kg
- **Mounting:** Floor-mounted
- **Suitable for:** wooden pallet racking 80 mm thick

User benefits:

- **Protection:** effective for 80 mm thick wooden pallet racking.
- **High resistance:** to impacts thanks to the 10 mm steel thickness.
- **Reduction of repair costs:** by safeguarding the structure.
- **Yellow coloring:** for visibility and operational safety.
- **Easy installation:** floor-mounted in logistic or industrial areas.

FAQ:

1. **What is this protection used for?**
   It serves to protect the bases of wooden pallet racking from accidental impacts caused by handling equipment.

2. **Is fixing material included?**
   No, the protection is supplied without screws or plugs for mounting.
3. **Which racking is it compatible with?**
   It is designed for 80 mm thick wooden pallet racking.
4. **What are the exact dimensions of the product?**
   The dimensions are: W 175 x D 140 x H 400 mm, with a steel thickness of 10 mm.
5. **Can it be installed on any type of floor?**
   Yes, it is compatible with industrial concrete floors or similar, using plugs and bolting (not included).

Mini buying guide:

When you need to secure a **wooden pallet racking**, it is essential to choose a **robust and compatible protection**. The h972_56 protection is designed to protect 80 mm thick wooden pallet racking by offering a solid and visible barrier against accidental impacts caused by forklifts, pallet trucks, and other warehouse equipment.

The 10 mm **heavy-duty steel** material ensures **high resistance** even in high-traffic environments; the **safety yellow** finish improves the visibility of critical points, helping to prevent collisions and structural damage.

The **floor installation system via bolting** allows for stable fastening adaptable to various types of industrial flooring; the **compact shape** and small footprint allow the protection to be easily integrated into **narrow aisles** or high-traffic zones.

It's the ideal choice for those seeking a product that combines **strength, efficiency, visibility, and ease of installation**, perfect for **warehouses, logistics centers, production plants**, and any area with intensive handling and the risk of repeated impacts.

It helps **extend the service life of your racking**, reducing maintenance costs and increasing the overall level of **operational safety** in the workplace.
