

Parking barrier h632_21

Galvanized steel parking barrier with reflective strips and cylinder lock, 96x45 cm. For delimiting private areas in garages, apartment buildings, offices.

The parking barrier is an access control solution designed to delimit and protect private parking spaces. It is ideal for use in condominium garages, office car parks, and private facilities where vehicle access needs to be regulated. Made of **galvanized steel**, it ensures durability and resistance to corrosion even in outdoor environments. Equipped with **reflective strips** high visibility that reduce the risk of accidental collisions, particularly in low-light conditions. The **cylinder lock** closing system allows for selective access control via key, thus controlling who can use the protected space.

Technical features

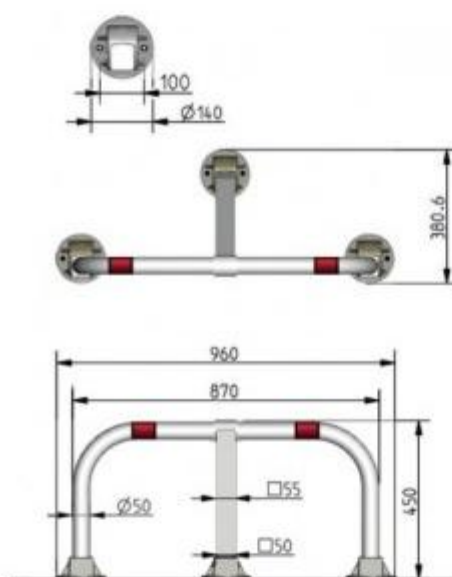

- Material: **galvanized steel**
- Dimensions: **W 96 x H 45 cm**
- Coating: **reflective strips**
- Closing system: **cylinder lock with keys**
- Equipment: **3 keys**
- Fixing: **using anchor bolts (not included)**
