

Parking space barrier h729_26

Folding steel barrier for private parking with European lock, 3 cast iron fixing points and reflective bands.

Parking barrier specifically designed for signaling and controlling access to **private parking areas** within garages and parking lots. The **folding steel** structure allows for flexible installation and practical space management, suitable for both temporary and permanent solutions.

The fixing system includes **3 cast iron anchoring points**, each equipped with **rubber shock absorbers** that absorb impacts and protect the ground from damage. Locking is guaranteed by a **European-type double-key lock**, which allows access control and prevents unauthorized use.

For visual safety, the barrier is equipped with **red reflective bands** that ensure visibility even in low light conditions, reducing the risk of accidental collisions.

Technical features

- Material: **steel**
- Lock: **European with double key**
- Fixing points: **3 in cast iron with rubber shock absorbers**
- Ground fixing screws: **included**
- Signaling: **red reflective bands**
- Configuration: **folding**
