

Patient transfer roll h664_03

Transfer board for disabled people in polyethylene with sliding cover. Max capacity: 350 kg. Dimensions: 95 x 50 cm.

The transfer system with sliding fabric is an indispensable product for **all medical-healthcare activities** and for those caring for **people with mobility problems** who therefore need to be transferred from one surface to another in a safe and easy way.

The transfer sheet is made of **polyethylene with sliding fabric** and **antibacterial silver** coating that can be cleaned with all common disinfectants. The **roll** features an extremely resistant structure with a maximum capacity of **350 kg**, making it ideal for moving obese patients.

The transfer roller is available in both the **folding** and **non-folding** version.

Technical features:

- Material: polyethylene with sliding fabric
- Antibacterial coating
- Color: silver
- Max capacity: 350 kg
- Dimensions: approx. 95 x 50 cm
- Available in both folding and non-folding versions
