

Patient transport carrying chair h722_04

Evacuation chair for patient transport. Capacity: 130 kg. Open dimensions: W53 x D.92 x h.138 cm.

Carrying chair for emergency operations. Specific for use in case of evacuation of injured persons in buildings without an elevator. Also suitable for use in public buildings, as it can be used by a single operator. Equipped with **braking tracks that rotate continuously** to ensure a controlled descent. **2 additional retractable handles** in the front part and a **retractable handle** on the back allow for ascent operations and overcoming architectural barriers.

Technical features:

- Max dimensions: W53 x D.92 x h.138 cm
- Minimum dimensions: W.53 x D.35 x h.115 cm
- Capacity: 130 kg
- Weight: 14 kg
- 2 rotating and self-braking tracks for a controlled descent
- 4 wheels, 2 of which are swiveling
- 2 additional retractable handles in the front part
- 1 retractable handle in the rear part
- Can be used on stairs with a slope between 28° and 39°
- Headrest
- Restraint straps
- Class I Medical Device
- CND: V0899
- RDM: 1410653/R
