

## Patient transport chair h667\_10

Professional lightweight metal patient transport chair, 4 wheels for flat surfaces, 120 kg capacity, space-saving foldable structure.

The **H667\_10 patient transport chair** is a professional device designed for the safe and comfortable movement of people with reduced mobility within healthcare and emergency contexts. The **4-wheel** configuration ensures optimal stability on flat surfaces, facilitating patient transfer between different departments or to emergency vehicles. Thanks to its **lightweight yet resistant structure**, the aid allows ergonomic load management, minimizing operator effort during evacuation or ordinary transit procedures.

## Technical features

- **Structure:** Lightweight and resistant with professional finishes
- **Movement system:** 4 integrated wheels for flat surfaces
- **Operating weight:** 9.6 kg
- **Maximum load capacity:** 120 kg
- **Dimensions in use:** 93 x 52 x 98 cm
- **Folded dimensions:** 83 x 52 x 26 cm
- **Operation:** Designed for use by 2 to 4 qualified operators
- **Suspensions:** Not provided in this model
- **Design:** Completely foldable for logistical optimization
