

Pedal bin for professional use h86_106

Professional 70-liter bin in anti-corrosive painted steel, with pedal opening, wheels and front access for easy bag extraction. This waste management bin is designed to meet the rigorous hygienic and operational requirements of professional kitchens, craft laboratories and industrial environments. The robust structure made of recyclable material and the pedal opening system ensure hands-free use, essential for preventing cross-contamination during food handling. The functional design integrates a front-opening solution that transforms daily maintenance operations into a fast and safe process.

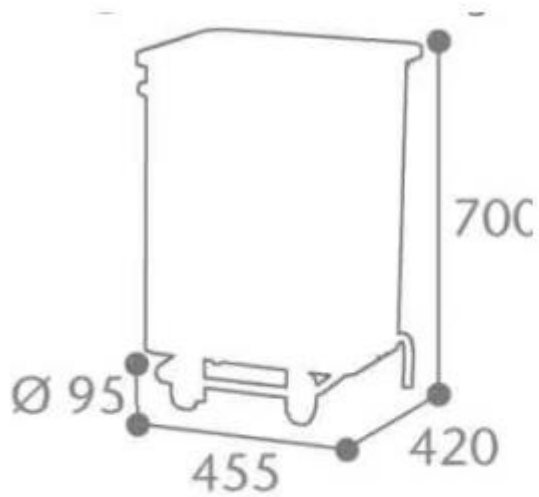

Technical features

- Dimensions: W 45.5 x D 42 x H 70 cm
- Weight: 9.75 kg
- Capacity: 70 liters
- Material: Recyclable painted steel with anti-corrosive treatment
- Opening system: Reinforced wide pedal mechanism
- Bag management: Openable front part for simplified insertion and extraction
- Mobility: Base with 2 support feet and 2 sliding wheels
- Transport: Integrated ergonomic handle
- Compliance: HACCP protocol for food safety
- Color: Signal white
