

Pedal bin in AISI 304 stainless steel h413_74

70L round bin in satin-finished AISI 304 stainless steel with pedal lid, trolley, and liquid-tight bottom for professional environments.

The 70-liter round bin represents a complete solution for waste management in high-traffic professional environments. Made of **satin-finished AISI 304 stainless steel**, it offers robustness and an elegant appearance over time, essential for kitchens, laboratories, public facilities, and spaces where hygiene and aesthetics are priorities.

The **pedal lid** ensures opening without manual contact, significantly reducing the risks of contamination and promoting correct hygienic waste management. The **integrated trolley** allows easy movement even in large environments, optimizing logistical management. The **liquid-tight bottom** prevents accidental leaks, keeping the surrounding area clean and facilitating cleaning operations.

Technical features

- Dimensions: Ø 40 × h 70 cm
- Capacity: 70 liters
- Material: AISI 304 stainless steel
- Finish: satin
- Lid: pedal-operated
- Trolley: integrated
- Bottom: liquid-tight
