

Pedal waste container h20_127

110L polished steel waste container, HACCP pedal, bag holder elastic, removable front. For commercial and working environments.

Static container for professional waste management in **commercial premises and work environments**. It ensures hygienic collection in compliance with health and hygiene regulations.

The structure and lid are made of **steel with a white glossy paint finish**, while the tubular supports ensure four stable support points. The container is equipped with a **bag holder elastic** that keeps the bag in position during use and the **removable front** facilitates rapid bag replacement.

The **wide opening** allows for the introduction of various types and sizes of waste. The **pedal control** ensures use without direct manual contact, complying with the **HACCP** method for food and hygiene safety.
