

Pedestrian barrier 3 meters h191_106

Pedestrian barrier for urban furniture length **3 meters**.

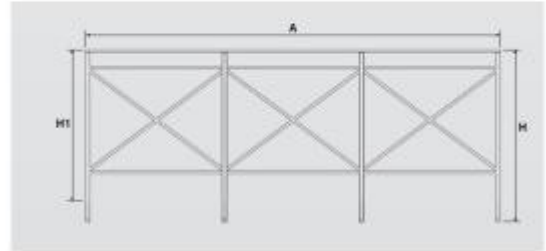

The lightness of the design, and the **tubular steel structure with a rectangular section**, make this **pedestrian barrier**, particularly suitable for continuously delimiting long stretches. Each module features two diagonals that connect in the center and is completed at the top by a handrail. The barrier is supplied as standard designed to be **buried in the ground**. The entire structure is galvanized and powder-coated in **micaceous grey**.

Technical Features:

- Steel Material
- Micaceous Grey Color
- Dimensions: L. 300x h. 125 cm
- Weight 34 Kg

INFORMATION

- Length in millimetres 3000.000000
- Height in millimetres 1250.000000
- fixing da interrare
