

Pedestrian barrier for public spaces h287_274

Pedestrian barrier with planter for urban furniture. Dimensions: L100 x H128 cm. Fixing: to be buried.

Pedestrian barrier for public spaces, ideal for preventing vehicle access in certain areas such as cycle paths and pedestrian zones. Thanks to its **elegant structure with integrated planter** and **decorative elements**, it also constitutes an excellent urban furniture element capable of beautifying and enriching open spaces. Made of **galvanized steel round tube**, specially treated to resist atmospheric agents and ensure a long life. Fixing is done by **burying the bases about 20 cm into the ground**.

Technical features:

- Dimensions: L100 x H128 cm
- Useful height: 100 cm
- Material: galvanized steel
- With planter
- Fixing: to be buried
- Supplied assembled
