

Pedestrian barrier for urban furniture h940_06

High-quality plastic pedestrian barrier, CE certified, durable and customizable with logo. Dimensions: 125 x 100 cm.

The **h940_06 pedestrian barrier** is a high-level solution for the delimitation of urban spaces, pedestrian areas, construction sites and public events. Made of **injection-molded polypropylene**, it stands out for its **unparalleled durability, robustness and design**, establishing itself as a leader in the Italian and European markets.

Designed to offer **maximum safety**, the barrier is built in **a single piece without screws or moving parts**, avoiding any sharp or cutting elements. This feature ensures safe installation even in high-traffic areas, minimizing risks for pedestrians and operators.

The barrier is **CE certified**, compliant with ANSI A10-18 1993 and UNE 222456 standards, respecting all current safety and quality regulations. Furthermore, it is **stackable**, which facilitates transport and storage, making it ideal for practical and fast use.

With dimensions of **125 x 100 cm**, the barrier is available in different colors to adapt to any context. Upon request, it is possible to customize it with a **logo via silk-screen printing**, making it perfect for public entities, companies or event organizers.

Choose the **h940_06 pedestrian barrier** for a reliable and customizable solution. Ideal for every delimitation need, it is ready to satisfy your needs with style and safety. Order now and request customization with your logo!
