

Pedestrian barrier with central flower h287_130

Galvanized steel boundary barrier with decorative elements at the corners and in the center. Dimensions: L100 x H128 cm

Pedestrian barrier for urban furniture suitable for delimiting specific areas. Structure with a main module composed of: **2 uprights in galvanized steel round tube with a diameter of 60 mm, 4 rails in galvanized steel round tube with a diameter of 30 mm** (two in the upper part and 2 in the lower part) and **an internal cross-piece also in galvanized steel round tube with a diameter of 20 mm**. The two rods forming the main module feature a **cast steel sphere** at the top, while at the intersection point of the cross-piece there are no. 2 (one per side) **flower-shaped decorative elements in forged iron**. The steel parts undergo a **pre-treatment process for degreasing impurities** using solutions and vapors; they are then dried and painted, covering the pieces **with non-toxic powder paint** according to current regulations; finally, they undergo **oven polymerization** to allow the powder to solidify. Fixing is carried out by **ground embedding**.

Technical features:

- Dimensions: L100 x H128 cm
- Material: galvanized steel
- Fixing: to be embedded by 20 cm

INFORMATION

- Length in millimetres 1000.000000
- Height in millimetres 1280.000000
- fixing da interrare
