

Barrier with extension for public spaces h744_44

Ornamental steel and cast iron barrier, 100x108 cm. Central decorative panel and in-ground fixing for the protection of historic centers and squares.

The **h744_44 barrier** represents a high-profile urban furniture solution, designed for the protection and **delimitation of public spaces** where the need for safety is combined with the protection of architectural decor. Thanks to its robust structure and ornamental finishes, this module is ideal for channeling pedestrian flows and protecting sensitive areas in historic contexts, squares, and monumental avenues.

The construction system is based on two lateral posts in **steel with a diameter of 60 mm**, enriched by decorative bases and spheres in **EN GJL 200 cast iron**, complying with the **UNI EN 1561** standard. The central body, a distinctive element of the product, is characterized by a frame of double concentric squares in hot-dip galvanized tubular steel, embellished with an artistic central cast iron frieze that gives it a classic and solid aesthetic.

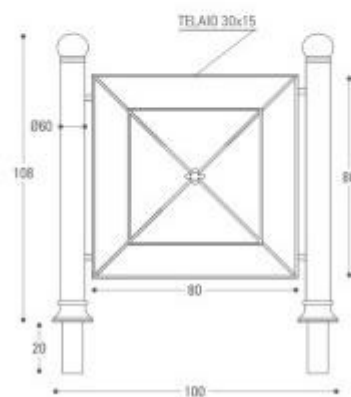

Technical specifications

- **Supporting structure:** 2 steel posts Ø 60 mm with spherical terminals.
- **Ornamental materials:** Bases, spheres, and central frieze in EN GJL 200 cast iron.
- **Panel frame:** 30x15 mm hot-dip galvanized steel tubular.
- **Panel dimensions:** 800 x 800 mm with reinforcing crossbars.
- **Overall dimensions:** Width 100 cm x Height 108 cm.
- **Fixing system:** Extension of the posts by 20 cm for anchoring through burial.
- **Surface treatment:** Hot-dip galvanization for high resistance to atmospheric corrosion.
