

Pediatric bed for children with 2 cranks h13_320

Light blue pediatric bed with 2 cranks, adjustable side rails and IV pole. Dimensions: W 188 x D 90 x H 126 cm.

The **H13_320 pediatric bed** represents a safe, ergonomic, and highly functional solution for the **hospitalization and care of children** in hospital settings, pediatric clinics, and specialized departments. Designed for intensive use, it features a **sturdy curved and welded steel structure**, complemented by **ABS plastic parts** and finished with **epoxy powder coating**, to ensure **resistance, hygiene, and long-term durability**.

The **blow-molded PP ends** effectively protect both the bed and the patient. The **aluminum alloy side rails**, adjustable to **3 heights**, have a **distance between bars of 8 cm**, and are equipped with an **anti-pinch system** for the safety of children's hands.

Comfort management is manual, via **2 mechanical cranks** positioned at the foot of the bed, which allow for **backrest adjustment up to 75°** and **leg adjustment up to 35°**, facilitating the work of medical staff and ensuring maximum well-being for the child.

The bed includes also: **stainless steel IV pole**, with a capacity up to 15 kg, **Ø 12.7 cm wheels**, all swiveling and 2 equipped with brakes for maximum safety, **breathable platform** with shaped ventilation holes, which prevent the formation of **pressure sores** and integrated **storage and shoe racks** to improve organization.

The light blue design makes the bed visually welcoming, helping to **create a reassuring environment for the child** during their stay.

Buy the **H13_320 pediatric hospital bed** now and offer your young patients safety, comfort, and functionality. Request a quote for multiple hospital or healthcare supplies.
