

Pediatric bed h13_130

Pediatric bed in epoxy steel with 62 cm sliding side rails, 4 castors (2 with brake), 140x70x130 cm, weight 35 kg. Italian production.

The pediatric bed is a solution dedicated to the hospitalization and stay of pediatric patients in hospital environments, specialized clinics, and care facilities. Designed with a **tubular steel supporting structure** and epoxy finishes, it guarantees stability, durability, and ease of sanitization. The **sliding side rails** allow for safe patient management, while the **castors** facilitate the mobility of the bed within the facility.

Technical features
