

Pediatric co-sleeping crib h934_03

Pediatric hospital crib adjustable in height via foot pedal. Dimensions: W. 90 x D. 50 x H. 110 cm approx.

The **hospital baby crib** is designed to ensure a safe and comfortable co-sleeping experience, thanks to the possibility of aligning the bed surfaces and the **height adjustment**, which varies from approx. 64 cm to 82 cm via a practical **foot pedal**. This crib is equipped with **twin-wheel casters with locking brakes**, facilitating movement and stability, so it can be easily positioned in different areas of the room. The **T-shaped foam mattress**, with a **washable and water-resistant cover**, is designed to adapt perfectly to the surfaces, creating a secure connection between the mother's bed and the baby's. The crib features a **removable transparent structure**, made of **PET**, which allows monitoring the newborn at all times. The **powder-coated steel frame** ensures durability and resistance, making this product an essential element for the comfort and safety of little ones.
