

Pediatric crib for neonatology departments h621_01

Hospital crib for newborns. Comfortable, functional and safe. Dimensions: W75 x D48 x H87/113 cm

Pediatric crib for clinics and hospitals. Featuring an innovative system that allows the new mother to pick up her baby without having to get out of bed; in addition, one of the two sides of the crib is rotating and can be opened, allowing her to rest next to the newborn without risk of falling or crushing. The structure features a **painted iron base** with dual-action braking wheels and **adjustable height**. The **basket is made of transparent and non-toxic material** that allows for monitoring the newborn; it also features openings along the sides and bottom that **facilitate cleaning and the passage of catheters or other cables**. Among the options, you can additionally purchase: the fire-retardant mattress and the convenient name tag holder.
