

Pediatric emergency trolley h564_80

Pediatric emergency trolley. Dimensions: 800x640xh.1680 mm

The **emergency trolley** is divided into **drawers**, each of which has a **color code** corresponding to one of the **different height and age ranges of the child**. Each drawer contains all the material necessary for the **resuscitation of a patient** within that **height and age range**, including **pre-dosed medications**. The structure consists of a **frame made of steel**, thickness 10/10, powder-coated on an epoxy base and finished with acrylic and polyurethane enamels, **scratch-resistant, stain-resistant, anti-corrosion, washable, and disinfectable**; the painting process complies with **UN EN ISO 9001** standards. Plexiglass **defibrillator-electrocardiograph platform**, dimensions 410x325 mm, **360° rotatable** with lock via knob in the chosen position, perimeter containment railing, and pre-setting for monitor locking straps. The support surface in **self-extinguishing ABS, stain-resistant and scratch-resistant, easy to clean, washable, and disinfectable**, dimensions mm **680x500x h. 60 mm**, with perimeter containment edge on three sides. **Removable painted steel drawers** sliding on telescopic guides, with **total extraction and automatic return**, are complete with an ergonomic and **anti-trauma aluminum handle and end-of-stroke locking stop**. Centralized locking key with seal system. Front panel colors: on request: red RAL 3000, yellow RAL 1018, green RAL 6029, cream white RAL 9001, sky blue RAL 5015, light green RAL 6019, oxide red RAL 3009. Standard drawer configuration: - **8 painted steel drawers**, dimensions **595x460x100 h mm**. LEFT SIDE - additional pull-out support surface, in technopolymer, self-extinguishing, complete with end-of-stroke stop and locking in closed position. Removable plexiglass cardiac massage board, complete with housing guides. RIGHT SIDE - push handle, ergonomic, anti-trauma.

Self-extinguishing technopolymer waste bin, knee opening. **Catheter-tube holder** in technopolymer. REAR – **IV pole with 4 hooks**, height-adjustable with one hand. Support in **painted steel** for oxygen cylinder **from 3-5-7 lt**, complete with **adjustable universal strap**. BASE - Double perimeter anti-tip and anti-shock bumper in technopolymer. 4 thermoformed swiveling solid rubber wheels, mounted on **Ø 125 mm bearings**, **2 of which with brake, 2 antistatic**.

Technical features:

- Painted steel structure material, thickness 10/10
- 8 removable drawers 595x460x100 h mm.
- Centralized locking key with seal system
- Pack of 100 colored seals, sequentially numbered
- Painted steel cylinder holder support
- 4 swiveling wheels Ø 125 mm, 2 of which with brake, 2 antistatic
- Ergonomic push handle
- Waste bin with knee opening, 10 lt capacity
- Catheter-tube holder in technopolymer
- IV pole with 4 hooks in technopolymer, height-adjustable dim. h. 1123/2100 mm
- Defibrillator holder platform in plexiglass 410x325 mm, 360° rotatable with knob lock, perimeter containment railing, and pre-setting for monitor locking straps
- Plexiglass cardiac massage board complete with two housing guides
- Dimensions: 800x640xh.1680 mm
- Customizable drawer colors on request
