

Pediatric examination couch h919_39

Pediatric examination couch with epoxy steel structure, high-density foam padding, synthetic leather upholstery. Dimensions 120x55x90 cm, load capacity 90 kg. Ideal for outpatient clinics and pediatric practices.

The **H919_39 pediatric examination couch** is designed to ensure comfort and safety for young patients during medical examinations. Ideal for pediatric offices, clinics, and hospitals, it combines a robust and resistant structure with a design conceived for practical and daily use.

The **steel structure with an epoxy finish** ensures stability, durability, and ease of cleaning, while the **high-density foam padding**, covered in **synthetic leather**, offers a soft and comfortable surface, easy to sanitize and resistant to wear. The compact dimensions make it perfect for small spaces without compromising the child's comfort and the doctor's ergonomics.
