

Pediatric ward crib h448_49

Pediatric crib in aluminum and steel for neonatology (90x47x97 cm), with Trendelenburg inclination $\pm 13^\circ$ and transparent methacrylate basket.

The **pediatric crib** is a specialized medical device designed for the neonatology departments of hospitals and clinics. Thanks to the combination of **aluminum, steel and ABS base**, the structure offers superior stability combined with optimal maneuverability. The **transparent methacrylate basket** ensures maximum visibility of the newborn from every angle, facilitating constant monitoring by medical staff. The adjustment system via side button and gas spring allows for the safe management of the postural positions required during the stay.

Technical features

- Overall dimensions: **W90 x D47 x H97 cm**
- Structure materials: Aluminum, steel and impact-resistant ABS base
- Basket: Transparent methacrylate, removable and with anti-tip safety system
- Postural adjustment: **Trendelenburg and reverse Trendelenburg ($\pm 13^\circ$)** position with gas spring control
