

Pesticide storage cabinet h283_28

Pesticide cabinet length 100 cm. with 3 internal perforated shelves.

Monobloc storage cabinet (spot-welded not assembled) designed for the **storage of phytosanitary products**. The **3 rectangular perforated shelves** allow for the percolation of **liquids accidentally spilled** from their containers; the **bottom collection tank** prevents possible spills on the ground and relative ground contamination. **100% Italian production**. Load-bearing structure made of **first-choice profiled sheet steel** thickness 6/10. **Special reinforced doors** equipped with **ventilation slots** in the upper and lower parts. **Special internal anti-burglary hinges with internal rotation pin invisible when the door is closed**. Rounded perimeter front edge anti-shock radius 6 mm. Longitudinal ribs on sides and doors. **Slots on the roof** to allow excellent air circulation. Surface treatment: by means of heavy iron phosphate as preparation for painting which occurs by anodic electrodeposition with guaranteed thickness in every part of the cabinet. Oven curing at 180°. Paints: acrylic with high corrosion resistance according to A.S.T.M.B. 117.64 and subsequent variations.

Technical features:

- Material: steel
- 3 rectangular perforated shelves
- Removable galvanized steel collection tank of 17 liters
- Identification and signaling sticker for the presence of dangerous products
- Label holder
- Dimensions: 100x40x180 cm
- Weight: 46 kg
- Standard body color: Grey RAL 7035
- Standard door color: Green RAL 6000

the cabinet is available with:

- Lockable metal handle with anti-tamper system
- Cylinder lock with double key supplied
