

Pesticide storage cabinet h976_07

Monoblock pesticide storage cabinet in 8/10 mm steel, 54x45x200 cm. Includes containment sump and ventilation slots for compliant chemical storage.

The **pesticide storage cabinet H976_07** represents a technical solution dedicated to the safe and organized storage of pesticides and chemicals in agricultural and industrial contexts. Made with a monoblock structure in **DC01/FeP01 UNI EN 10130 steel** and electro-welded panels with a thickness of 8/10 mm, the device guarantees high mechanical resistance and superior stability thanks to the 100 mm steel plinth base.

Operational safety is ensured by a hinged door with **internal burglar-proof hinges** and a 180° rotation pin, integrating slots for natural ventilation that prevent the stagnation of potentially harmful vapors. Locking is provided by a cylinder lock with a double key, essential for managing controlled access to hazardous substances, marked externally by appropriate labeling in compliance with current regulations.

Technical specifications

- **Type:** Monoblock cabinet for pesticides
- **Structure material:** DC01/FeP01 UNI EN 10130 steel (thickness 8/10 mm)
- **Base:** H 100 mm steel plinth
- **External dimensions:** W 54 × D 45 × H 200 cm
- **Internal compartment dimensions:** W 53.8 × D 43 × H 190 cm
- **Internal equipment:** 1 containment sump (H 70 mm, 28 L) and 3 adjustable shelves on rack (6 L each)
- **Lock:** Cylinder with double key and one-way lever closure
- **Ventilation:** Ventilation holes for natural air exchange
- **Finish:** Green RAL 6011 epoxy-polyester painting
- **Weight and volume:** 40 kg for 0.49 m³
- **Regulations:** D.Lgs. 81/2008, EN UNI ISO 9001, EN UNI ISO 14001, UNI tests on product and finishes
