

Phlebology step stool h740_08

Stainless steel step stool for medical offices, 2 steps, non-slip surface, lateral handle, 200 kg capacity.

Specialized step stool for medical and outpatient environments, designed to facilitate patient access to examination tables while minimizing effort and fall risks. The **18/10 stainless steel** structure ensures hygiene, sterilizability, and durability over time, essential characteristics in healthcare contexts. The **lateral handle** provides a secure support point, particularly useful for patients with vascular or balance issues. The **non-slip tread surface** ensures constant grip even in humid or frequently cleaned environments.
