

Photocatalytic concrete bench h338_40

White photocatalytic concrete bench. Dimensions: W. 200 x D. 50 x h. 50 cm.

Urban furniture bench made with a **mixture based on a photocatalytic principle capable of breaking down pollutants present in the air**, in particular nitrogen oxide and PM10 fine dust. This also makes the bench durable over time and resistant to atmospheric agents. **White color without water-repellent finish.**

Technical features:

- Dimensions: W. 200 x D. 50 x h. 50 cm
- Weight: approx. 420 kg
- Color: white
- Material: photocatalytic concrete
- The material used is capable of breaking down pollutants present in the air
