

## Physiotherapy exercise mattress h. 10 cm h581\_56

Physiotherapy mat 200x100x10 cm in foam rubber and class 2 fire-retardant PVC. Removable cover, antibacterial and equipped with transport handles.

The **physiotherapy exercise mat** is a professional solution designed to ensure stable and comfortable support during rehabilitation sessions, postural gymnastics, and manual therapy. The internal core in **foam rubber** ensures calibrated impact absorption, protecting the patient's joints during ground movements. The **600 gr/m<sup>3</sup> PVC** coating was selected for its high resistance to wear and for its fundamental hygienic properties in clinical settings, being an antibacterial and anti-mite material.

## Technical features

- Dimensions: 200 x 100 x 10 cm
- Padding density: 16 kg/m<sup>3</sup>
- Internal material: high-resilience foam rubber
- Coating material: PVC 600 gr/m<sup>3</sup>
- Fabric properties: antibacterial, anti-mite and class 2 fire-retardant
- Closure system: zipper for complete removability
- Transport: reinforced sewn-in integrated handles
- Maintenance: washable and sanitizable surface
- Color: blue
