

Physiotherapy foam and faux leather mat h. 5 cm h731_73

Professional fire-retardant foam mat (21 kg/m³), 200x140x5 cm, with removable and washable red canvas-backed faux leather cover.

The **fire-retardant padded mat** represents an advanced technical solution for professional contexts requiring high standards of safety and comfort. Designed specifically for intensive use in rehabilitation and sports fields, the support integrates a **graduated density foam core (21 kg/m³)** capable of offering balanced support during exercise execution, minimizing the risk of sinking. The structure is completed by a high-resistance **canvas-backed faux leather** cover, which guarantees mechanical durability and ease of sanitization.

Technical features

- **Dimensions:** L 200 x W 140 x h 5 cm
- **Internal core:** Graduated density foam (21 kg/m³)
- **Cover:** Red canvas-backed faux leather, fire-retardant
- **Maintenance:** Removable finish and washable surface
- **Safety:** Rounded edges and side padding for perimeter protection
- **Properties:** Certified fire-retardant material

Optional: Upon request and subject to a quote, it is possible to customize the mat in different colors to adapt to the visual identity of the facility.
