

Physiotherapy PVC mat h. 5 cm h581_55

Foam rubber and PVC gymnastics and rehabilitation mattress, 200x100x5 cm. Hygienic, removable cover, with handles and class 2 fire-retardant certification.

This **professional mattress** has been specifically designed to support corrective gymnastics, physiotherapy, and motor rehabilitation programs. The combination of the foam rubber core and the technical cover makes it a reliable solution for medical centers, gyms, and collective facilities requiring high standards of safety and hygiene. The internal structure ensures **constant support** during floor exercises, preventing direct contact with the floor and cushioning the body load.
