

Picnic set with wireless charging, USB and Schuko sockets h1003_11

Picnic set with galvanized and painted steel structure, top and seats made of WPC slats. 2 wireless charging points, 2 USB ports and 2 Schuko sockets.

The **h1003_11 picnic set** combines functionality and durable design, thanks to its **galvanized tubular steel structure painted with thermosetting polyester powders** which guarantees excellent durability over time and resistance to atmospheric agents. **Seats and top** are made with **WPC slats**, an innovative composite material with high resistance to wear and external agents, perfect for outdoor use.

In the **center of the top**, a convenient **surface with 2 points for wireless charging** in compact polycarbonate is integrated, allowing compatible devices to be charged without cables. In the lower part of the table, at least **two USB ports** and **two Schuko sockets** are available, located in a protected stainless steel compartment that ensures the protection of the electronic components. The wiring is completely hidden inside the structure for a clean and safe design.

The installation of the set is simple, intended via **bolts (not supplied)**, thanks to the pre-arrangement in the structure. The total dimensions are generous, to comfortably accommodate several people: total footprint of **L. 2200 x D. 1850 x h. 740 mm**, with bench **L. 2200 x D. 400 x h. 450 mm** and table **L. 2200 x D. 800 x h. 740 mm**. The **steel structure** is available in **various RAL colors**, to adapt to any outdoor environment.

Choose the h1003_11 picnic set for a functional, modern, and always connected outdoor relaxation area!

Technical features:

- **Total dimensions:** L. 2200 x D. 1850 x h. 740 mm
- **Bench dimensions:** L. 2200 x D. 400 x h. 450 mm
- **Table dimensions:** L. 2200 x D. 800 x h. 740 mm
- **Structure materials:** galvanized tubular steel painted with thermosetting polyester powders
- **Top and seat materials:** WPC slats
- **Wireless charging:** compact polycarbonate surface integrated with 2 wireless charging points
- **Sockets:** at least 2 USB + 2 Schuko, protected stainless steel compartment
- **Wiring:** completely hidden in the structure
- **Fixing:** pre-arranged for bolts (not supplied)

FAQ:

1. **How is the picnic set installed?**
Installation is carried out using bolts (not supplied).
2. **Which devices can be charged via the wireless system?**
Qi wireless charging compatible devices, such as smartphones and other recent devices.
3. **Are the USB and Schuko sockets protected from external agents?**
Yes, they are housed in a protected stainless steel compartment to ensure safety and durability.
4. **Can the set be used outdoors all year round?**
Yes, thanks to the weather-resistant materials, it is suitable for continuous outdoor use.

5. Is it possible to choose the color of the structure?

Yes, the steel structure is available in various RAL colors to suit the environment.

Mini purchase guide:

Choose a **picnic set** with a **galvanized steel structure** if you want durability and robustness. The **WPC slats** ensure resistance to wear and atmospheric agents, ideal for outdoor environments. The presence of integrated **wireless charging** and **USB and Schuko sockets** facilitates the use of electronic devices during outdoor relaxation. The **compact polycarbonate surface** protects the charging area, while the **electronic components housed in stainless steel** guarantee safety and protection. The structure with **hidden wiring** ensures a clean and safe design. Finally, choose the RAL color that best suits your outdoor space.

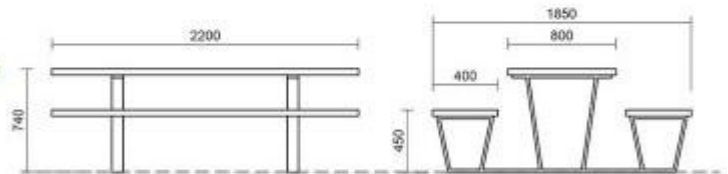

Picnic set, wireless charging, USB ports, Schuko sockets, galvanized steel, WPC slats, urban furniture, outdoor table.
