

Picnic table with benches in recycled plastic h424_71

Table with benches for urban furniture in recycled plastic and steel structure. Dimensions: W.2000 x D.1750 x H.750 mm.

The picnic set for urban furniture consists of a table and two benches made from recycled plastic and is ideal for public gardens and municipal parks, as well as coastal areas. Recycled plastic, unlike wood, is in fact more resistant to the salt corrosion typical of maritime areas.

The structure of the table and benches is instead made **of galvanized steel treated to be anti-corrosive and built to allow use by people in wheelchairs.**

Thanks to the high-quality materials the product is extremely resistant to atmospheric agents and wear and tear over time.

Finally, recycled plastic contributes to the respect and defense of our planet.

Technical features:

- 1 table
- 2 benches
- Material: recycled plastic
- Galvanized steel structure
- Anti-corrosion treatment
- Inclusive structure
- Dimensions: W.2000 x D.1750 x H.750 mm.
